The Danish National Travel Survey
Annual Statistical Report

Copenhagen Area

2022

Data version TU0622v1

Annual Statistical Report

Copenhagen Area 2022

The survey

The Danish National Travel Survey (in Danish: Transportvaneundersøgelsen, TU) is a continuous survey of travel patterns for Danish Residents over 6 years of age. The basic survey design consists of one-person, one-day interviews, conducted at random days during the year. Please refer to www.tudata.dk for more information on the survey.

Using this report

This report may be distributed and cited freely, with proper reference to the report, the Danish National Travel Survey and DTU. The survey may be referenced by DOI: 10.11581/dtu:00000034

Contents of the report

The aim and content of this report is a statistical picture of the transport patterns 2022 for residents over 6 years of age in the Copenhagen Area, defined as NUTS DK011 and DK012, which is approximately the same as the built area.

The tables and figures of this report are, unless otherwise stated, based on persons born 2016 or earlier, resident within the borders of the Copenhagen Area.

Table 1: Data foundation

Residents in the Copenhagen Area	Women	Men	2022 total
Number of interviews	1 489	1 462	2 951
Number of trips	4 524	4 220	8 744

Data version: TU0622v1

Due to rounded figures, columns and rows may only approximately account to the stated sum.

The - is used in tables, when a combination has not been observed in the survey. 0.0 indicates, that the combination has been observed, but evaluates as 0.0 .

Table of Contents

This report contains the following tables and figures:

Main results

Table 2: Key figures, by gender page 5

Modes of transport

Table 3: Mileage and travel time by mode page 6

Table 4: Modal split, journeys by mode chain type page 6

Table 5: Time series, modal split, journeys by chain type group page 7

Figure 6: Time series, modal split, journeys by chain type group page 7

Figure 7: Time series, collective share of journeys page 7

Table 8: Time series, modal split by mileage page 8

Figure 9: Time series, modal split by mileage (grouped) page 8

Figure 10: Time series, collective bus market share by mileage page 8

Table 11: Journeys by length and chain type page 9

Table 12: Total road mileage and travel time, sum per day page 10

Table 13: Average working day vs. average day traffic page 11

Table 14: Local and regional road mileage page 11

Purpose

Table 15: Trips, distance and total travel time by purpose page 12

Table 16: Journeys, distance and travel time by primary purpose page 13

Figure 17: Purpose distribution by trips and journeys page 13

Table 18: Trips by purpose group and mode chain type page 14

Table 19: Travel time by purpose group and mode chain type page 15

Table 20: Mileage (PKM) by mode and purpose group page 16

Figure 21: Mileage by purpose group page 17

Table 22: Vehicle mileage by mode and purpose group page 18

Table 23: Journeys by purpose group and mode chain type page 19

Commuting

Table 24: Commuter journeys by chaintype page 20

Table 25: Time series, modal split, workplace commuting page 21

Figure 26: Time series, commuter modal split page 21

Figure 27: Collective share of workplace commuting page 21

Socioeconomics

Table 28: Gender, mileage and travel time by mode page 22

Table 29: Gender, journeys and travel time by chaintype page 23

Table 30: Gender, journey primary purpose page 23

Table 31: Age groups, mileage by mode page 24

Table 33: Age groups, journey primary purpose page 25

Table 34: Occupation groups, mileage by mode page 26

Table 35: Occupation groups, journeys by chain type page 27

Table 36: Occupation groups, journey primary purpose page 27

Table 37: Income groups, mileage by mode page 28

Table 38: Income groups, journeys by chain type page 29

Table 39: Income groups, journey primary purpose page 29

Definitions

Annual Average Day Traffic	Any traffic statistic calculated as average of all 365 days in the year. This definition is understood, when 'per day' is stated. [Danish: Årsdøgntrafik, abbrev. AADT or ÅDT]
Business Trip	<i>Business Trips</i> are any trips, with trip purpose as a professional activity, conducted at a destination elsewhere than the ordinary workplace. Notice the difference to Commercial Transport . [Danish: erhvervstur]
Chain Type	Mode <i>Chain Type</i> is a qualitative aggregation of the modes on a trip or journey , such that all cases with collective transport are classified as such. [Danish: kædetype]
Collective Transport	<i>Collective Transport</i> is any mode of transport, where independent travellers are transported by the same physical vehicle, if only route and time is identical. This definition is almost, but not quite the same as public transport. Public transport generally includes e.g. taxis, which are not collective.
Commercial Transport	<i>Commercial Transport</i> is defined as any transport activity, where the actual movement is the commercial purpose. This is different from the business trips , where the commercial activity is done at each destination. Classic examples on <i>Commercial Transport</i> are bus drivers and train drivers. However, the category also includes driving schools, police patrols and certain other jobs. [Danish: erhvervstransport]
Journey	A <i>Journey</i> is defined as the entire chain from home, return home. Each <i>Journey</i> consists of at least 2 trips : outbound and homebound. [Danish: rejse]
Means (of transport)	The individual, physical vehicle of transport: "My red bicycle".
Mode (of transport)	Generic classification of transport modes: buses, trains etc.
Primary Destination	The <i>Primary Destination</i> of a journey is defined by the stay with the longest dwell time. [Danish: primært ophold]
Primary Mode	The <i>Primary Mode</i> of a trip or journey is the mode of transport with the greatest, aggregated, travel distance. [Danish: primært transportmiddel]
Primary Purpose	The <i>Primary Purpose</i> of a journey is defined as the purpose at the primary destination , ie. the stay with the greatest dwell time. [Danish: primært formål]
Train	The category <i>Train</i> includes all railborne modes of transport, including Metro and Light Rail/Trams. [Danish: tog]
Trip	A <i>Trip</i> is defined as the movement from one destination to the next. A <i>Trip</i> applies one or more means of transport. [Danish: tur]
Trip Purpose	The <i>Trip Purpose</i> is defined as the purpose at the end of the trip , directing towards the primary destination of the journey . [Danish: turformål]

Main results

Table 2: Key figures, by gender

	Women	Men	Total >= 6y	
Average, total number of trips	3.1	3.0	3.0	trips per person per day
- excl. commercial transport	3.0	2.9	3.0	trips per person per day
Nonmobile rate (0 trip rate)	19%	17%	18%	(rate on avg. day)
	Women	Men	Total >= 6y	
Average, total travel time	58.6	57.5	58.1	mins per person per day
	Women	Men	Total >= 6y	
Average, total mileage	24.4	28.2	26.2	km per person per day
- hereof motorized modes	20.5	24.1	22.3	km per person per day
- hereof bicycle	2.2	2.6	2.4	km per person per day
- total, excl. commercial transport	24.4	27.8	26.1	km per person per day
	Women	Men	Total >= 6y	
Avg. trip length, excl. commercial transport	8.0	9.5	8.7	kilometers per trip
	Women	Men	Total	
Bicycle ownership	73.9%	74.9%	74.4%	(share of pop. >=6y)
Driving licence	77.8%	83.9%	80.8%	(share of pop. >=18y)

Modes of transport

Figure 6: Time series, modal split, journeys by chain type group

Graphical illustration of table 5, above.

Modal Split is reported at the journey level, because the choice of bicycle or car generally applies to the entire journey from home, until return home. Collective Transport is reported as such, including any intermediate walking trips on the journey.

Figure 7: Time series, collective share of journeys

Graphical illustration of collective (public) transport share of journeys, from table 5 above.

Table 8: Time series, modal split by mileage

(population 10-84 years of age, modal split by mileage with confidence intervals)

	Walk etc.	Bicycle etc.	Car etc.	Collect. bus	Train	Other

The purpose distribution is shown by 2 alternative definitions. By trip purpose above reflects the individual trips and destinations, whereas the journey primary purpose (overleaf) reflects the longest stay on the journey. Travel time for commercial transport has been omitted for technical reasons. This omission induces a small difference in total travel time.

Table 16: Journeys, distance and travel time by primary purpose

Primary purpose (journey)	Journeys		Mileage (PKM)		Total travel time	
	per pers/day	%	km/pers/day	%	mins/pers/day	%

Extract defined as journeys with primary target workplace or educational place. This includes journeys with business trip or school excursions, if the permanent commuter destination is the primary target on the journey. Notice, that the primary target is defined as the destination with the longest dwell time.

Table 25: Time series, modal split, workplace commuting

Journeys with primary target workplace in the Copenhagen Area, by mode chain group. Calculated on basis of persons 10-84 years of age, with confidence interval.
