

Seminar: Simulation modelling of paratuberculosis within herds

Contact: Michael Ward
Date: September 30, 2015.
Location: Vet School, Sydney.

Carsten Kirkeby from the Technical University of Denmark presents a new Danish simulation model for *paratuberculosis* on dairy farms. The model is a tool for farmers to take cow-specific decisions towards control or eradication of *paratuberculosis*. Future challenges and perspectives of modeling Johne's Disease will be discussed after the presentation.
