

Problems

- ✓ Energy services are often delivered as isolated measures or projects.
- ✓ There is a lack in monitoring and verification of energy efficiency improvement measures.
- ✓ Value creation and responses to customers' needs are seldom visualized.
- ✓ Unclear connection between energy efficient operation, property value and other customer values.

the Solution: Energy Efficient Facilities Management (EE-FM)

Benefits

- ✓ Improved energy performance and net operating income.
- ✓ Implement profitable maintenance with added values.
- ✓ Improve indoor climate and comfort level.
- ✓ Improved operations with less repairs and unplanned maintenance.
- ✓ Improved environmental performance.

So what?

- ✓ Energy use can account for more than half of the operational cost in a multifamily residential building!
- ✓ Large energy savings potential in existing building stock!
- ✓ The avoided kilowatt-hour is the best one; for economy, the environment and comfort.
