ERRATUM TO: Application of shotgun metagenomics to smoked salmon experimentally spiked: Comparison between sequencing and microbiological data using different bioinformatic approaches

Alessandra De Cesare,¹ Chiara Oliveri,² Alex Lucchi,² Frederique Pasquali,² Sünje Johanna Pamp,³ Hanne Mordhorst,³ Claudia Wylezich,⁴ Casper Poulsen,³ Gerardo Manfreda²
¹Department of Veterinary Medical Sciences, and ²Department of Agricultural and Food Sciences, Alma Mater Studiorum University of Bologna, Italy; ³Technical University of Denmark, Lyngby, Denmark; ⁴Friedrich-Loeffler-Institut, Federal Research Institute for Animal Health, Greifswald Insel Riems, Germany

The authors would like to correct the authorship in this publication, for the below-mentioned reason.

Four co-authors (Johanna Pamp Sünje, Hanne Mordhorst, Claudia Wylezich-Casper Poulsen) have not been listed in the original version of the paper, due to an underestimation of the time needed to publish the results of PT as a whole, for which the dataset selected as described in the manuscript has been submitted. As a consequence, part of the mock community used in the PT has been described in the paper published in Italian Journal of Food Safety for the first time.

Therefore, these authors involved in the design and preparation of the mock community, as well as spiking of the samples, should be added. Their contribution is detailed below:

- Pamp Sünje Johanna, designed mock community, contribution to design of ring trial.
- Mordhorst Hanne, preparation of the spiked samples, shipping ring trial samples.
- Wylezich Claudia, conceptualization and addition of the virus in the mock community.
- Poulsen Casper, preparation of the mock community.
